

Net Graphics New Zealand

Welcome to Net Graphics New Zealand

NGNZ are specialists in design and maintenance of websites. We can help you get your company a web presence.

From a domain name (www.yourcompany.co.nz), to a fully functional multi media website with user interaction, we are the first and last stop you need to make.

Web design does not have to cost you thousands of dollars like some other places would like to make you believe. We will give you the use of pre-designed template sites free of charge*.

You can build your site yourself and control what the content is when you want. Or you might want us to look after it for you (charges apply).

All our template sites come with a 'Content Management Console', allowing easy day to day management of your site.

Adding pages to your site has never been easier. Our hosting fully supports

1. Content Management System
2. MySQL Database
3. PHP Server-side Scripting Language
4. CGI-Bin
5. Webmail
6. 20 real (pop3) email accounts plus unlimited email aliases
7. 100MB of web space for your website and emails
8. Secure Smart Start Control Panel

Net Graphics New Zealand is also a reseller for Datawest and its VoIP (Voice over Internet Protocol) phone system. Through us you could save up to 35% of you current communication needs.

Naked broadband is used making the phone line charges a thing of the past.
